## Pick Guns **WENDT**

These pick guns work based on the principle of percussion.

This means that hard out blows are placed onto the lock's pins by the pick blade. In return, the pin tumblers within the plug hit the outer pins with great force. The inner pin tumblers hit the outer pins compressing the springs and creating a small gap between inner and outer pins. If this gap can be created exactly at the edge of the plug, the plug itself, put under slight tension with a tension tool, can be unlocked.

Introduce the pick needle and apply rotational tension to the plug

Vibrate the pins out of the shearline and turn the plug

### Electronic Pick Set - UK

**WENDT**

Adjustable Frequency

CODE: LS-W3600EC-UK

#### Contents:

- 1x ZIEH-FIX® Electronic Pick.
- 2x Pick "Novum" Straight Blade, 0.5mm.
- 2x Pick "Novum" Angel Blade, 0.5mm.

## Commercial Lock Pick Set For LS-W3600 - 39 Pieces

**WENDT**

### CODE: LS-W3620-SET

When confronted with complicated lock cylinders difficult to pick, only the use of laser-cut picks blades made from hardened spring steel may lead to success. These pick blades can be used with the Electro Pick and with a handle.

### Contents:

- 3x 3515E Pick "Novum", Rake Tip, diamond, 5 peaks.
