DANALOCK

Danalog residential smart locks replace the traditional home door key with an electronic system that allows you to use your smartphone to control your door, your guests and your home.

Easy to install and manage, Analog lays the foundation for a truly smart home when it comes to security.

The Danalock V3 is the third generation of motorized smart lock based on the feedback from early adopters, customers and the latest development in data security and smart home technology.

Smaller, stronger and easier to install, the Danalock V3 takes the lead in the smart lock market and is setting new standards for years to come.

Easy access.

With Danalock, sharing access with relatives and friends is extremely easy- you can receive notification when the lock is used - and by whom - along with impressive features that eliminate the problems of mechanical keys.

And in addition, Danalock senses your presence and knows just when to unlock or lock the door (which is similar to how modern vehicles operate).

Easy to install.

Danalock's installation is so simple, you can do it yourself in five minutes or less.

Subtle, yet secure.

The beauty of Danalock's residential smart lock lies within. Danalock smart locks are simple in appearance, but offer the sophisticated security your home needs.

The enabler to smart home possibilities.

Interoperability has always been a cornerstone in Danalock products. The V3 is by far the most versatile and flexible platform available and is setting new standards in cross platform interoperability.

EASY ACCESS

MANAGE FAMILY, VISITORS – EVEN THE DOG WALKER – WITHOUT HANDING OUT KEYS.

There's a lot going on in today's households: children coming in from school, dog walkers, housekeepers, babysitters. Even grocery store delivery services are now offering the option to enter your home to put groceries away. Managing keys to address the needs of today's busy homes has become too burdensome and insecure.

Dalock's residential smart locks provide simple management that can be adjusted quickly and easily.

Mobile Keys make it so much more convenient.

Approved guests can come and go with just a smartphone.

Access sharing is easy.

With SMS text, Email, WhatsApp (and more) you can create keys for your family, friends and home employees like the housekeeper or babysitter.

Temporary access.

Keys can be programmed with time restrictions.

Key cancellation on the fly.

With Danalock, you can cancel anyone's access immediately on the fly from your app.

Instant notifications.

Danalock's app sends instant notification of who accessed the door – perfect for keeping tabs on when the kids come and go.

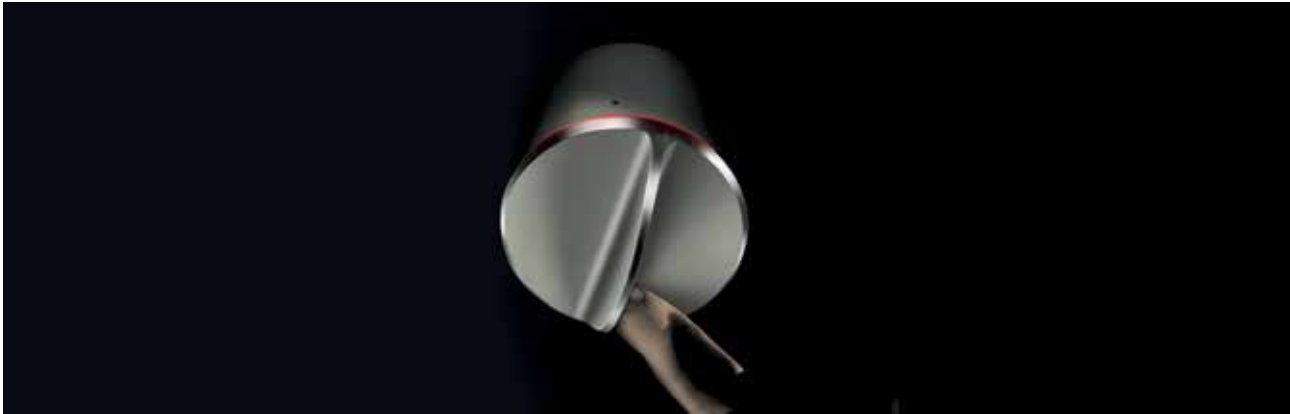

NO HANDS NEEDED!

NO MORE FUMBLING AROUND SEARCHING FOR KEYS IN YOUR POCKET OR PURSE.

Danalock senses your presence and knows just when to unlock the door (which is similar to how modern keyless entry vehicles operate).

Have children with a curfew? Easily enforce curfew by scheduling a time when doors automatically lock.

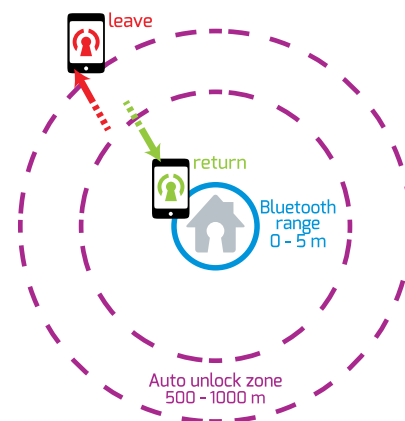

Twist Assist.

Turn the handle slightly and the door locks or unlocks. You can twist assist again 5 seconds after the Danalock has finished turning. A smart solution, even for people with reduced mobility.

Automatically unlocks when you approach the door.

With auto unlock activated, coming home is as easy as it gets. The automatic GEO location detection determines your position when you enter the auto unlock zone approximately 500 - 1000 m from your Danalock, and unlocks your door when you get in Bluetooth range 0 - 5 m from your door.

Automatically locks when you leave.

Thanks to the automatic timed locking, it is also possible to automatically lock your door to increase your peace of mind.

Some features may be affected by the smartphone model and/or the quality of the GEO location signal.

EASY TO INSTALL

YOUR HOME SMART LOCK EXPERIENCE STARTS IN 5 MINUTES OR LESS.

Danalock has been designed to simply retrofit most existing doors. Just install its base plate and snap on the Danalock.

Global compatibility.

Compatible with European cylinders, Scandinavian and US deadbolt cylinders, Danalock V3 can be retrofitted without having to touch the door. No door drilling and no footprint on the door.

Install the Danalock V3 on a compatible European cylinder, or just remove the existing internal knob and replace it with the Danalock V3, always using the adaptation kit included with the product.

Easy set up directly from your smartphone.

The set up is incredibly easy. Just download and install the Danalock App on your phone in seconds and be guided fast and easy through the calibration and setup of your Danalock.

ON ANY TYPE OF DOOR

Danalock Universal module.

The Danalock Universal module is a special device that enables you to control doors such as garage doors, doorstrikes, electromechanical or magnetic locks, gates, windows, shades, etc. Completely integrated on the Danalock platform, it enables operation of such locking devices with your Danalock V3.

SUBTLE, YET SECURE.

No need for flashing lights or visible moving parts to alert passersby that your house is protected by one of the most technologically-advanced electronic lock solutions on the market.

The beauty of Danalock's residential smart lock lies within. Danalock smart locks are simple in appearance, but offer the security your home needs to protect what matters most.

No footprint on the door. No evidence of how it is protected.

With Danalock your door looks just like a normal door with a standard-looking lock, there is no impression of an electronic lock.

Always enabled.

Mechanical key override exists in the event of a forgotten or lost smartphone or no battery power. You will always be able to access and operate your lock.

Safer inside.

Electronics are housed on the inside of the door, providing protection against vandalism, adverse weather, etc.

Unmatchable security standard.

Danalock uses AES256, the most advanced encryption method for transferring data and TPM – Trusted Platform Module – to store encryption keys.

This high security level has been acknowledged by companies like Apple, Amazon, Google Nest and many others.

No footprint on the door.
No evidence of how it is
protected.

SMART HOME

OPEN THE DOOR TO ENDLESS SMART HOME POSSIBILITIES.

There's a growing network of smart devices in your home – thermostat, lights, alarm system – and Dalock smart locks work seamlessly with these products. The smartest of smart devices work together to provide user comfort, convenience and cost-savings.

DANALOCK INTEGRATIONS

INTEROPERABILITY HAS ALWAYS BEEN A CORNERSTONE IN DANALOCK PRODUCTS.

The V3 is by far the most versatile and flexible platform available, and is setting new standards in cross platform interoperability.

Let Danalock sense you are near and trigger all your smart home commands.

Z-wave and Zigbee integrations

Danalock offers different Z-Wave versions, and also a Zigbee version. This enables it to be integrated in different ecosystems like Amazon Echo, Nest, IFTTT, Harmony, etc., converting the Danalock V3 as the trigger or starter that will boost your home system as soon as you unlock your door.

Airbnb integration

The Danalock Airbnb integration enables you to share mobile keys directly to the guest's smartphone for the period of time that the home has been rented through the Airbnb platform. No need to give physical keys, and after the stay the mobile key expires.

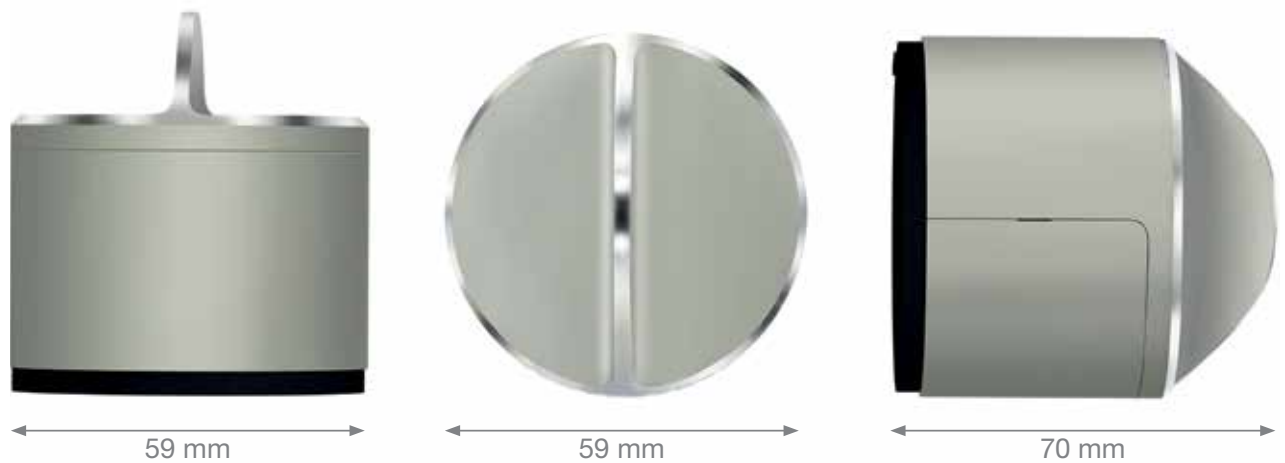

SDKs and APIs

Danalock delivers full SDKs and APIs for partner integrations, enabling easy integration with existing systems like home automation, booking platforms, etc.
