

DANABRIDGE

Control your Danalock V3 smart lock from anywhere you want and get a full overview of when, how and by whom the lock has been used.

Overview:

The Danabridge V3 is part of the Danalock product family. It serves as a smart bridge between your Danalock V.3 lock and your local router. It connects to your router via Wi-Fi and to your Danalock V3 over Bluetooth.

This allows you to monitor your Danalock V.3 as well as lock and unlock your door 24/7 from any location using your existing Danalock Mobile App.

Unlocking and locking via Danabridge is enabled for only one person – the administrator (owner) and it's perfect for homeowners, landlords or people sharing their apartments through home-sharing platforms like Airbnb and Booking.com.
