

HU162T (9-CUT) 2IN1 PICK & DECODER FOR VAG2015 WITH REMOVABLE TENSION BAR

You can use the HU162T (9-CUT) to pick and decode VAG models from 2019 onwards which require the removal of the tension bar to access recessed door lock keyholes (Golf MK8, Audi Q3 etc). As you can see in the picture, the tool also comes with an allen key and a separate tension bar.

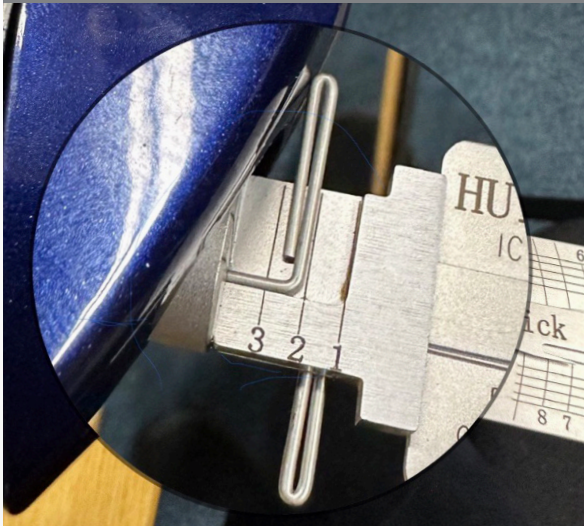

Using the Allen key provided it's really easy to remove the tension bar and insert the tool into the lock.

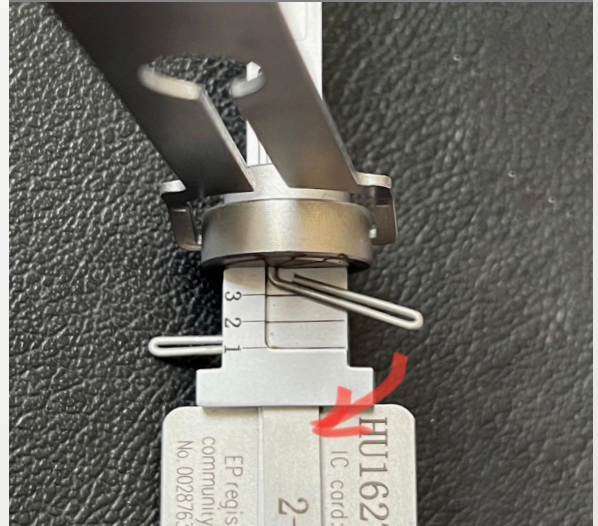

HU162T (9-CUT) 2IN1 PICK & DECODER FOR VAG2015 WITH REMOVABLE TENSION BAR

Unfortunately, when you try to pick side cut number 3, the picking arm still catches the edge of the handle.

To prevent that from happening, you will have to bend the picking arm as shown in the picture.

As shown, the picking arm can now reach side cut number three without catching the handle.

Attach the separate tension bar as shown and you can pick and decode the lock.
