

DORCAS K16 KEYPAD

Dorcas K16 keypad offers an exclusive design and high quality features. It has authentication via touch keypad or card and incorporates Bluetooth for control through the SmartDorcas APP.

A complete system for access control widely used in rental homes or for areas where authentication is necessary to access. The device supports up to 1,000 users who can access it using its keyboard or by using a card.

Access via Bluetooth will be done with the mobile application, turning the smartphone into an access card that we can program as you wish, defining groups of users and schedules.
